Elements of Beauty

COLLAGEN LIFT

Information Sheet

Collagen Lift tightens, tones and lifts non-surgically. Achieving firm, youthful looking skin while preventing signs of aging. Collagen Lift is non-invasive so you can achieve transformational results without the detrimental effects associated with injectables and fillers.

What is Collagen Lift?

Collagen Lift, also known as the 'Facelift Facial', is a non-surgical treatment for skin tightening and firming, loose or sagging skin.

How does Collagen Lift work?

Collagen Lift uses the body's own natural healing to turn back the clock on aging. Results can be seen instantly.

The benefits of Collagen Lift.

Instant visible results that can last for up to two years, it's a game changer for non-invasive, skin rejuvenation treatments.

Collagen Lift is the ideal treatment for tightening and firming the skin on your face and body, avoiding surgical anti-ageing procedures. The radio frequency technology used for this treatment is highly effective for skin tightening and firming loose or sagging skin. With Collagen Lift you can look forward to increased muscle-tone, a modified jawline and diminished fine lines and wrinkles.

We recommend a course of six sessions completed either one a week for six weeks or two a week for three weeks, after this we suggest a single session every four to six weeks to maintain the results. Top-up courses of six treatments are recommended every two years. Depending on the client, results from a single session of Collagen Lift may be seen instantly.
