- Premium ingredients high-quality Rio flavour (vitamin B2) Bromaline the scything.
- Highly concentrated optimal dose of ingredients used.

Lemon Bottle Fat Dissolving injections. The fastest and strongest fat dissolver in the industry. This treatment is completely safe and shows results from 24-hours.

Lemon Bottle fat dissolving is a cosmetic procedure that uses a solution of natural ingredients to breakdown fat cells and promote weight loss. The solution is injected into fatty deposit area and turns the fat into fatty acid which is then eliminated through urine. The solution may contain lemon juice, water, Ribiflavin, Lithecin, Bromelain and other substances that increase the metabolism of fat cells. Water intake must be increased after the treatment to help flush out the fatty acid.

The science behind the fat dissolving injections.

The solution 'Lemon Bottle' is injected into the fatty deposit area, the solution then breaks down the stubborn fat wall, breaking each cell down turning the fat into fatty acid, which is then eliminated through your bladder each time you wee. Water intake must be 2L a day after treatment to help flush the fatty acid out quicker. Any abdominal areas are advised for you to fast for six hours prior and six hours after, so bear that in mind when booking your appointment, this includes milk in coffee. This is so you get the most out of the session and your fat cells start to break down quickly and more effectively. Arm and chin areas do not require any fasting.
