Lumi Eyes

Information Sheet

This treatment provides maximum hydration, lifting the eye area delicately and slightly to reduce the appearance of dark circles, helps smooth those fine lines and provide a boost of goodness exactly where our faces need the most protection

Lumi Eyes is a high-quality injection product based on Polynucleotides (obtained from purified salmon milk DNA) that repair damage to the dermis with tissue regenerating material. It treats dark circles under the eyes, moisturises and fights fine wrinkles as well as smoothing and lifting the skin under the eyes.

It is NOT a filler. Lumi Eyes is a skin booster specifically designed for the under eye area. It is like injectable skincare for the eye area two to three sessions are required four weeks apart for optimal results. It has zero downtime.

"Not only does it rejuvenate the under-eye area but it also reduces the signs of aging and reveals a radiant, youthful glow. Prepare to be amazed by this all-in-one treatment that goes beyond expectations."

- Complex whitening and skim rejuvenation
